

# Dripline Fittings

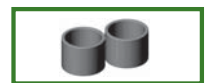

John Deere Water is making a good connection in the field with the dripline fittings. From an extensive line of barb fittings, reducers, elbows, and adapter, we've got the fitting for you. Because the fittings are so well engineered, they create good seals and have a grip that's hard to break.

The dripline fittings are available in multiple sizes, matching up with 12, 16, 17, and 20 mm dripline and hose sizes. From the connection to the manifold or to the end of the line, we've got you covered.
