

PRO-FLAT™

Premium PVC layflat

JOHN DEERE
WATER

John Deere Water's PRO-FLAT™ brand Layflat Hose is a versatile, durable hose which meets the needs of growers everywhere. The layflat is made with premium resins which allow the product to withstand the tough conditions endured in the agricultural and the mining industries. The thick wall dimensions and the strong yarn structure help the product to hold connections and resist bursting. Additionally, the construction reduces the amount of rotation and elongation each time the system is pressurized. The layflat is used for a variety of applications for several industries including agricultural, horticultural, and mining. Applications include transfer lines, sub-main lines, and discharge lines.

PRO-FLAT™ is available in numerous sizes to meet the requirements of your design. The premium layflat is a perfect complement to the other John Deere Water products in your irrigation system.

Specifications

Color: Green

Diameters - 1 1/2" to 10"

Working pressures - 35 to 90 PSI bar
(pressure is related to the diameter of the hose)

PRO-FLAT provides growers with a versatile hose for both transfer of water and sub-main applications.

Because of numerous hose sizes available, layflat is an excellent irrigation system component choice for all sizes of operations.
